

# EVELETH SPURS

Yellow Design Studio | [yellowdesignstudio.com](http://yellowdesignstudio.com)

1

To add a spur, type one of the following letters:

## Left Side Spurs

**H** - vertical spur, matches most characters

**A** - angled spur matches angle of the A

**S** - angled spur matches angle of the S

**V** - angled spur matches angle of the V

**W** - angled spur matches angle of the W

**Z** - angled spur matches angle of the Z

## Right Side Spurs

**h** - vertical spur, matches most characters

**a** - angled spur matches angle of the A

**s** - angled spur matches angle of the S

**v** - angled spur matches angle of the V

**w** - angled spur matches angle of the W

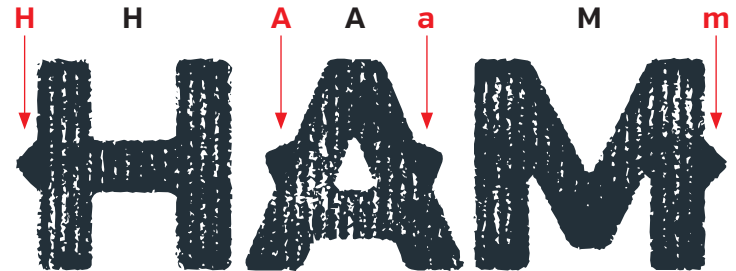

**z** - angled spur matches angle of the Z

2

Select the spur letter and activate either Stylistic Alternate, Swash, or Stylistic Set 1 opentype features. [They all work the same.]

3

Kern the spur to the letter until touching.

Note: not all angled letters are well suited for spurs, in which case no specific spurs are provided.
