

AMERICAN MONOGRAMS v1.0

©2014 Harold Lohner

haroldsfonts.com • hlohner@aol.com

A unique font to make custom 1-, 2-, 3-, or 4-letter monograms in a Western woodtype style with optional stars and stripes decorations.

Install the font like any other and restart the application you want to use it in.

1. First, type an optional border, if desired. Here are the options, keystrokes in red.

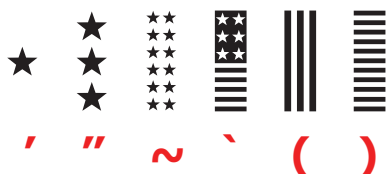

2. Type a decoration, if desired, to accompany each small letter. Here are the options, keystrokes in red. Each is an up-down pair.

3. Type a small letter using lowercase (a-z).

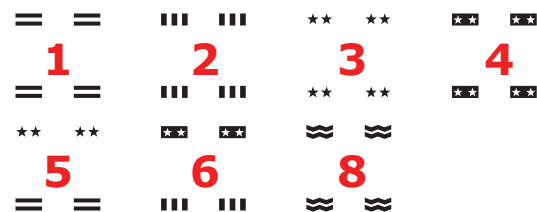

4. Type a large letter using uppercase (A-Z).

5. For 1-letter monograms, use the 3-letter style, but replace the small letters with one of these options (keystrokes in red) or 2 spaces.

6. For A&B style monograms, you can find a small ampersand in the **7** position and a large one in the **&** position.

7. For convenience in creating 3-letter monograms, skip step 2 and use these keys to add decoration to both small letters at once.

8. Instead of a border (step 1), you can type a row of stars above and below your monogram.

Type **0** before a 3-letter monogram; type **9** before each letter in a 2- or 4-letter monogram.
